TC Premium Eggcrate

The TS Premium opal eggcrate louvre is designed to be a rigid product with a good visual cut off. This louvre has a cell configuration of 15 x 15 x 13 mm. It is injection moulded on the most modern computer controlled system and each individual louvre is coated with an anti-static fluid to prevent the airborne dirt and dust from sticking to the cell walls during installation.

The standard TS Premium polystyrene and acrylic louvres are manufactured with an opal finish.

Other colours are available, subject to quantities. TS Premium Louvres are suitable for many applications. Each louvre is moulded with full cell overlapping ends (as in photo). This enables the louvre to be installed in continuous run lighting systems with the cells lining up. TS Louvres are moulded in a range of panel sizes. Panels can also be cut to customers individual requirements
